

Doug,

STAT

I think [ ] should read this dispatch, as it seems obvious to me, from his statement in para. 2 of his memo, he didn't read it very well. problem

As I see it, this/could very well start mushrooming like the ole atom cloud. In the first paragraph of the dispatch [ ] mentions that all personnel have made it a practice to bring in radios and HI FI sets without clearing customs; however, in para 5 he is only recommending that the PCS personnel be allowed to ship HHE thru project supply channels

STAT

I am sure that the TDY personnel [ ] ~~xx~~ have run into the same problem and that ~~xx~~ we should find out how these people have managed to export their radios and HI FI sets in the past without incurring the wrath of [ ]

STAT

If the TDYers have a moral, if not legal, system, then we should let the PCSers jump on the bandwagon.

STAT  
STAT

One problem I see with the airlifting of HHE [ ] is ~~xx~~ what happens to the effects when they hit [ ] Are they then put into the military supply channels [ ] as bona fide HHE or as classified cargo or will they be shipped commercially ?
